

Steri -7 Protects & Cleans For Hours

As cases rise across the UK and the world the need for protection against harmful bacteria and germs has never been greater. From the little we know about Swine Flu its clear that it's spreading from person to person is like any other virus - through coughing, sneezing and contact with infected surfaces or people. Simple precautions can be taken to prevent the spread and personal risk of infection from these viruses - which is where Oxford City Supplies can help!

Steri 7 is :

A new generation, high level broad spectrum biocidal cleaner

Effective across soiled conditions and can be used on most surfaces including fabrics.

The only cleaner with RBT - Residual Barrier Technology an inert barrier that immediately protects the surface, is reactivated by moisture and is effective between cleans

Steri 7 kills 99.9999% of bacteria and continues to protect hours after the surface has been cleaned

Hand Sanitiser

Unlike alcohol hand sanitisers Steri- 7 has a residual barrier that when applied to hands will not only kill the pathogens that are present, but will continue to work for up to three hours, ensuring that you are guarded against subsequent infection.

Available in:

<i>Code</i>	<i>Description</i>	<i>Units</i>	<i>Price</i>
19/23	75ml Hand sanitisers	4	£ 13.98
19/23A	Belt Clip (for above)	Each	£ 2.00

Surface treated using a cleaner / sanitiser

Surface treated using STERI-7

From the government information guide sent to all homes:

Flu viruses are made up of tiny particles that can be spread through the droplets that come out of your nose and mouth.

If you cough or sneeze into your hand, those droplets and the germs in them are then easily spread from your hand to any hard surface.

Door handles, computer keyboards, mobile and ordinary phones and the TV remote control are all common surfaces where flu viruses can be found
